

Zoom Webinar Series on Diversity, Equity, Inclusion and Respect (DEIR) and co-sponsored by Women's Chemist Committee

Thursday, April 27, 2023 4-5pm Pacific Time

Shaping the Future Through Science: A Personal Story of Innovation, Education, and Community Building

Speaker: Prof. Princess Imoukhuede, PhD

Hunter and Dorothy Simpson Endowed Professor and Chair of Bioengineering at the University of Washington

Join me on a journey that began with childhood curiosity and has led to a career dedicated to shaping the future through scientific innovation, educational impact, and community building. Through my experiences at renowned institutions including the Illinois Math and Science Academy, MIT, Caltech, Johns Hopkins, University of Illinois at Urbana-Champaign, Washington University in St. Louis, and the University of Washington; I have developed a unique approach to systems biology research that has the potential to improve labor and delivery outcomes in women's health. Along this journey, I have been guided by core values that have helped me make a broader impact in the scientific community. As I discuss my journey and current work as the chairperson of my department, I hope to inspire others to follow their passions, values, and use their talents to make a difference in the world.

All are welcome! Register in advance for this webinar:
